**Subject: ANHYDROUS AMMONIA AWARENESS
AND EMERGENCY RESPONSE TRAINING
OCTOBER 4th – 6th, 2022**

In order to provide continued anhydrous ammonia safety training to our valued employees, CALAMCO will provide Anhydrous Ammonia Awareness and Emergency Response Training at the Stockton Fire Department Training Center located at 110 West Sonora Street, Stockton CA 95203. Training dates for 2022 are October 4th – 6th; class will begin at 8:00 am and conclude at 12:00 pm (*Check-in starts at 7:30 am*). Attendees need only attend one day and lunch will be provided.

This training is designed to help meet regulatory mandates and provide participants with overall basic safety awareness when working with anhydrous ammonia and anhydrous ammonia-based products. As a user or provider of anhydrous ammonia it is important to ensure that our employees are aware of the hazards involved in storage, transfer, transport, and application of this acutely hazardous substance. It is also critical that employees are aware of the first aid measures needed following an exposure to ammonia products. Federal and State regulations require that all involved with hazardous materials receive training under the Hazard Communication standard. If CALAMCO requires you to perform any role in an anhydrous ammonia-related emergency at the work site, Emergency Response training is also required (29 CFR, 1910.120 and CCR Title 8, paragraph 5192).

Please sign up in the Control Room by Monday, September 26, 2022, or reach out to Francine Cabrera as soon as possible.

The Fire Department classroom limits us to 50 attendees daily, in the event we have too many on a particular date we may have to ask you to move to a different date.

Please contact Francine Cabrera via phone at (209) 235-3266, or via email at francine.cabrera@calamco.com with any questions or concerns. We look forward to seeing you at the 2022 class.
